

# Pinwheel Activity

1. Cut out the template - you should be left with a square.
2. Cut along the dotted lines. Be sure to stop at the end of the dotted line.
3. Take a corner with a dot and bring it towards the center dot. Repeat this with all the corners that have a dot.
4. Use a pin to attach your pinwheel to a pencil or wooden dowel. Don't make this too tight- your paper won't have room to spin.
5. Blow on your pinwheel and watch it spin!
